

Correction to A Solvent-Mediated Coarse-Grained Model of DNA Derived with the Systematic Newton Inversion Method

Aymeric Naômé,* Aatto Laaksonen, and Daniel P. Vercauteren

J. Chem. Theory Comput. **2014**, *10* (8), 3541–3549. DOI: 10.1021/ct500222s

Page 3543. There is a mistake in eq 4:

$$K_{\alpha}^{(1)} = K_{\alpha}^{(0)} + \frac{1}{\beta} \ln[S_{\alpha}^{(0)} - S_{\alpha}^*] \lambda \quad (4)$$

It should instead read as follows:

$$K_{\alpha}^{(1)} = K_{\alpha}^{(0)} + \frac{1}{\beta} \ln \left(\frac{S_{\alpha}^{(0)}}{S_{\alpha}^*} \right) \lambda \quad (4)$$
